PERSONAL INFORMATION

Date of Birth: 01-July-1979 • **Marital Status:** Married • **Citizenship:** Indian

CORE TECHNICAL SKILLS

- **Languages & Frameworks: Core PHP, Laravel, Multi-tenant SaaS, Python, FastAPI, OpenCV, jQuery, CodeIgniter, Bootstrap, JavaScript (Chrome Extensions / Manifest V3)**
- **Databases:** MySQL (Query Optimization, Restructuring)
- **Infrastructure & DevOps:** VPS, VDS, WHM, AWS Server Migration
- **Integrations: Multiple Payment Gateways, Meta WhatsApp Business API, WhatsApp Web Chrome Extension → CRM Sync, Facebook Adsense Management, Bulk Mailing, Hylafax Interface Automation**

PROFESSIONAL EXPERIENCE

Sr. Web Developer | *Weblinkindia.net Pvt. Ltd.* (Sep 2012 – July 2026)

Technologies Used: PHP, MySQL, jQuery, Facebook Leads API, 3rd Party Integrations

- https://www.exportersindia.com: Managed end-to-end backend architecture, front-end optimization, Member Panels, Admin Panels, automated billing subsystems, and 3rd party API integrations (including Facebook Adsense management).
- https://www.tourtravelworld.com: Led code refactoring, structural rewrite of underlying SQL schema, and modern HTML integrations for enhanced performance optimization.
- https://www.matrimonialsindia.com: Successfully executed full restructuring of backend systems to improve platform stability and scale.
- Additional enterprise portals optimized and maintained: https://www.placementindia.com, https://www.realestateindia.com, and https://www.weblinkindia.net/.
- Stingo WhatsApp Chat Reader (Chrome MV3): Built a production Chrome extension and PHP REST import API to sync WhatsApp Web chats into Stingo CRM — including live message sync, company API-key auth, phone-to-lead mapping, duplicate-send cache, and Chrome Web Store packaging/privacy compliance.

Founder & Lead Architect | *Propnal.com (Personal SaaS Project)*

Technologies Used: Laravel 12, MySQL, stancl/tenancy, Blade/Alpine, Vue 3, Razorpay, Meta WhatsApp, Voice AI

- Designed and engineered a production-ready, multi-tenant SaaS architecture offering absolute tenant isolation and domain mapping capabilities.
- Implemented strict Role-Based Access Control (RBAC) handling distinct authorization levels for Super Administrator, Reseller, and Domain/Business User paths.
- Developed a highly flexible, multi-theme visual layer allowing individualized UI choices across discrete tenants.

- Built a modular system framework allowing zero-downtime additions of core applications including E-commerce platforms, Multi-Level Marketing (MLM) utilities, Lead Generation & CRM modules, Task Management, and Automated Subscription Billing.
- Integrated robust business communication frameworks: Meta WhatsApp Business Automation, AI Voice Calling channels, and high-volume SMS/Email marketing systems.

Sr. Web Developer | *Dot2dotz.com* (1+ Year Contract (Remote))

Technologies Used: Laravel, jQuery, MySQL, VPS, VDS, WHM, AWS

- Designed and constructed scalable application backends from scratch for https://www.dot2dotz.in/.
- Updated, optimized, and deployed responsive homepage front-ends for https://www.dot2dotz.com/.
- Successfully planned and executed seamless infrastructure migration from complex AWS environments to clean WHM (VDS server) layers.

Web Developer | *Hans New Media* (Sep 2007 – Sep 2012)

Technologies Used: PHP, MySQL, jQuery, CodeIgniter, Bulk Mailing Systems, Payment Solutions

- Architected robust core web applications and custom content management systems for targeted corporate clients.
- Integrated multi-platform billing workflows and custom payment solutions.
- Built secure request parsing layers protecting high-traffic systems from SQL injection vulnerabilities.

TECHNICAL INTEGRATIONS & INFRASTRUCTURE

- **Payment Gateways:** Extensive production deployment experience with CCAvenue, HSBC, PayPal, HDFC (implemented advanced payload argument encryption mechanisms), and mPay24.com.
- **Social Media Integrations:** Implementation of customized OAuth configurations for smooth Facebook SignUp and Login modules.
- **Infrastructure Engineering (Hylafax):** Engineered scalable automation utilities leveraging a mix of Perl (to streamline fax transmission engines) and PHP frontend triggers to parse inputs and document attachments natively.

KEY PROJECTS

Stingo WhatsApp Chat Reader | Chrome Extension + PHP API (2026)

Technologies Used: Chrome Extension (Manifest V3), JavaScript, PHP, MySQL, REST APIs, Chrome Storage / Content Scripts / Service Workers

- Developed a Manifest V3 Chrome extension that reads chats from WhatsApp Web and syncs them into Stingo CRM for authorized company users.
- Implemented bulk import and live sync for new messages, with a local sent-cache to prevent duplicate uploads.
- Built a PHP REST import endpoint with Bearer API-key authentication, company scoping, and phone-based CRM lead matching.
- Prepared Chrome Web Store listing assets, privacy policy, and production deploy hardening (auth gates, request logging, access controls).
- Source: https://github.com/radheshyamweblink/stingo-whatsapp-chrome-ext

Face Detection & Identification System | Laravel + Python FastAPI (2026)

Technologies Used: Laravel 12, Python, FastAPI, OpenCV (YuNet + SFace), MySQL, REST APIs, ONNX

- Built an end-to-end face identification system for static crowd photos: Laravel handles registration, storage, and results UI; a FastAPI service performs detection, embedding, and matching over HTTP.
- Implemented known-person enrollment (single-face reference photos stored as 128-d encodings) and crowd-photo identification that labels matched people and flags unrecognized faces with on-image bounding-box overlays.
- Integrated OpenCV YuNet (detection) and SFace (recognition) ONNX models to avoid heavy native C++/dlib toolchains, with calibrated L2 match thresholds for reliable same-person vs. different-person separation.
- Modeled MySQL entities for people, face encodings, detection jobs, and per-face results; wired synchronous Laravel HTTP client calls to the Python /encode and /identify APIs.
- Source: https://github.com/radheshyamweblink/face-detection

Propnal SaaS (B2B Platform) | Laravel Multi-Tenant Reseller Platform (2026)

Technologies Used: Laravel 12, MySQL, stancl/tenancy, Blade/Alpine, Vue 3 (WABA), Razorpay, Meta WhatsApp, Voice AI (Python bridge)

- Built a multi-tenant reseller SaaS (Super Admin → Reseller → domain-identified tenant sites) with themes, RBAC, wallets, and new billing plans/subscriptions.
- Shipped vertical addons end-to-end: MLM, Food Connect, Real Estate, Institute, Law, Hospital, Freelancer/Photographer marketplaces, AI mailing, Video campaigns, WhatsApp (WABA + Flow builders), and Voice AI calling.
- Seeded industry demo fleets online (restaurant/Foodlet, real-estate portals, MLM ecommerce showcase) for client presentation and end-to-end validation.

EDUCATION & QUALIFICATIONS

- **B.Sc. in Computer Science & Mathematics** — Allahabad University (Last Year Dropout)
- **Intermediate (PCM)** — U.P. Board
- **High School** — U.P. Board

CERTIFICATIONS

- **Data Science Training Program — MENTORTCA Technology Pvt. Ltd. (TCA), Mar–Sep 2025, Grade A · ID TCA9776**
